# Where do you get information about politics and current events? (q22)

Select all that apply

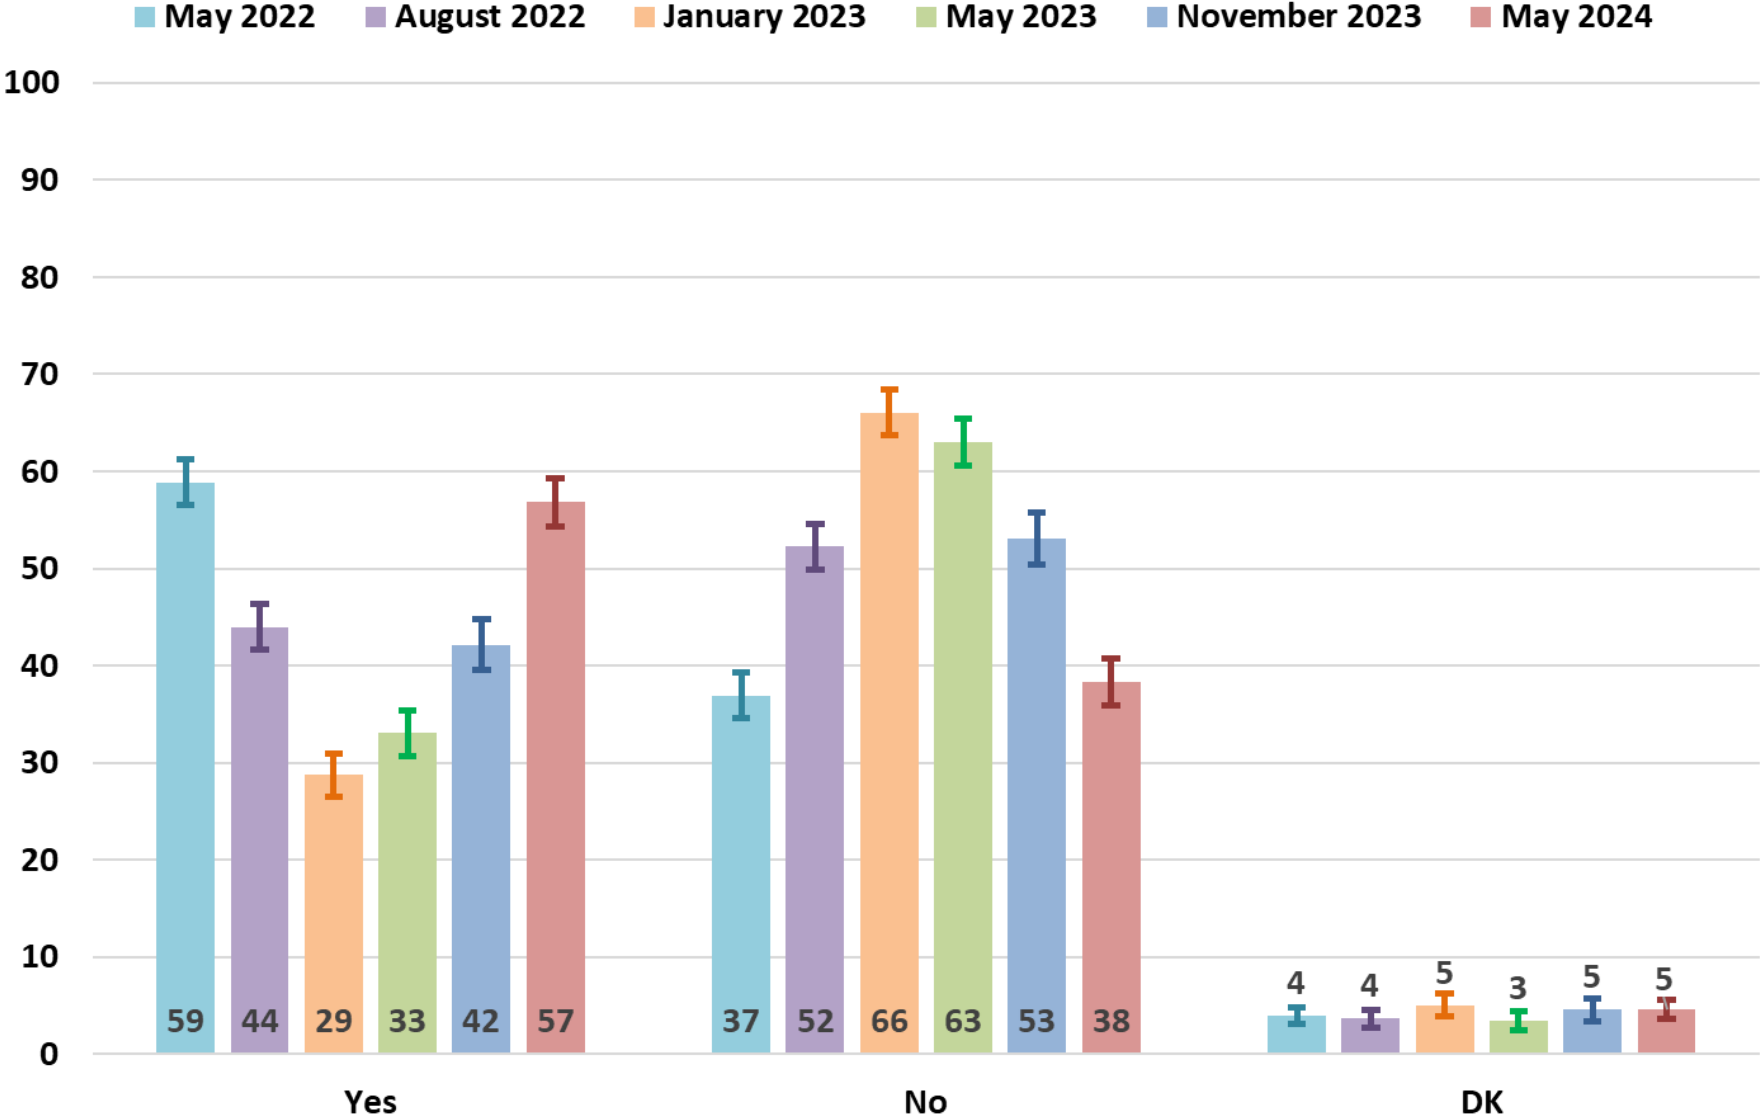

# To what extent would you accept each of the following as the price for peace? (q23)

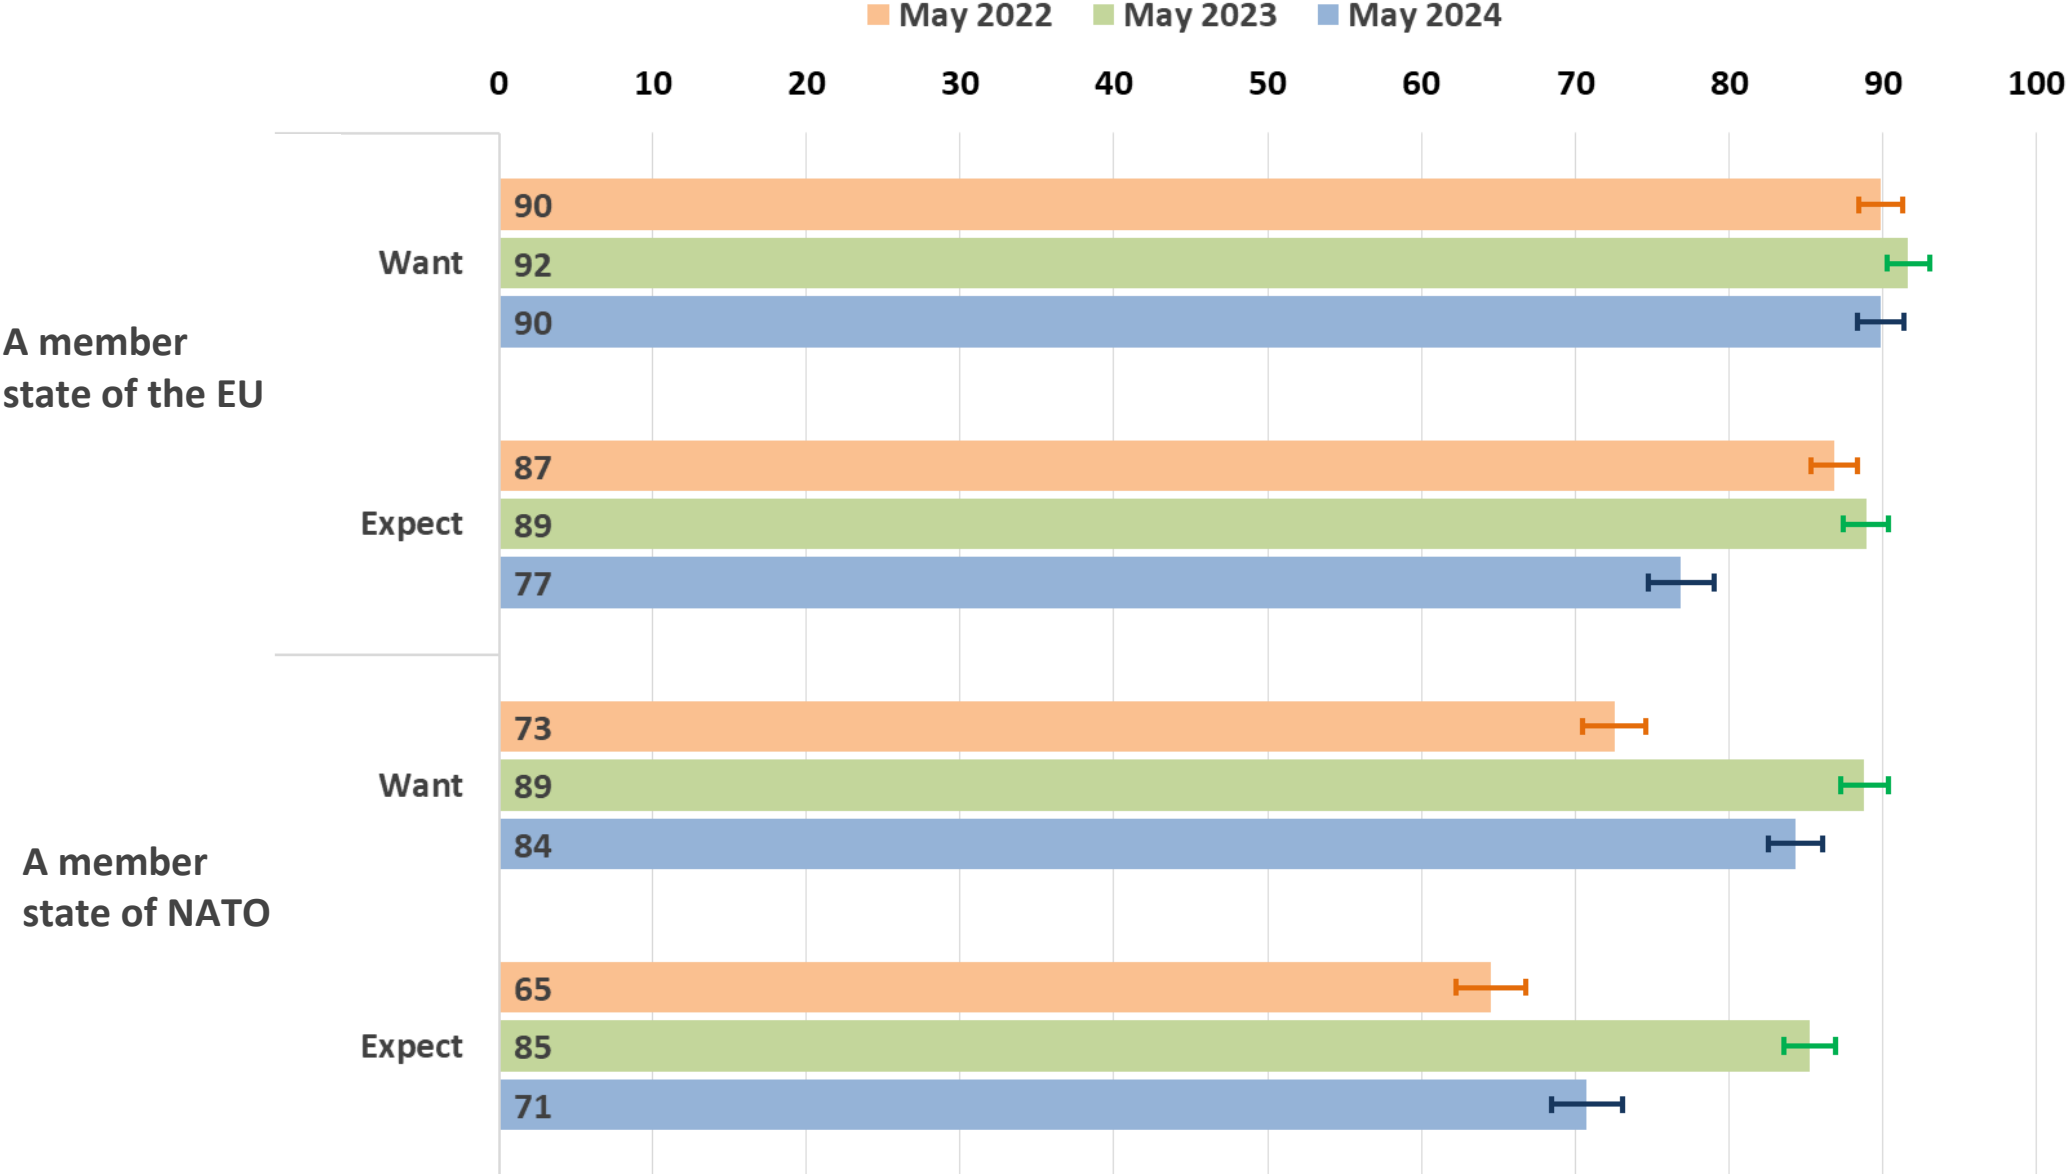

■ Fully unacceptable    
 ■ Somewhat unacceptable    
 ■ Somewhat acceptable    
 ■ Fully acceptable    
 ■ DK    
 ■ RA

# Do you think that Ukraine should engage in negotiations with Russia to try to achieve peace? (q24)

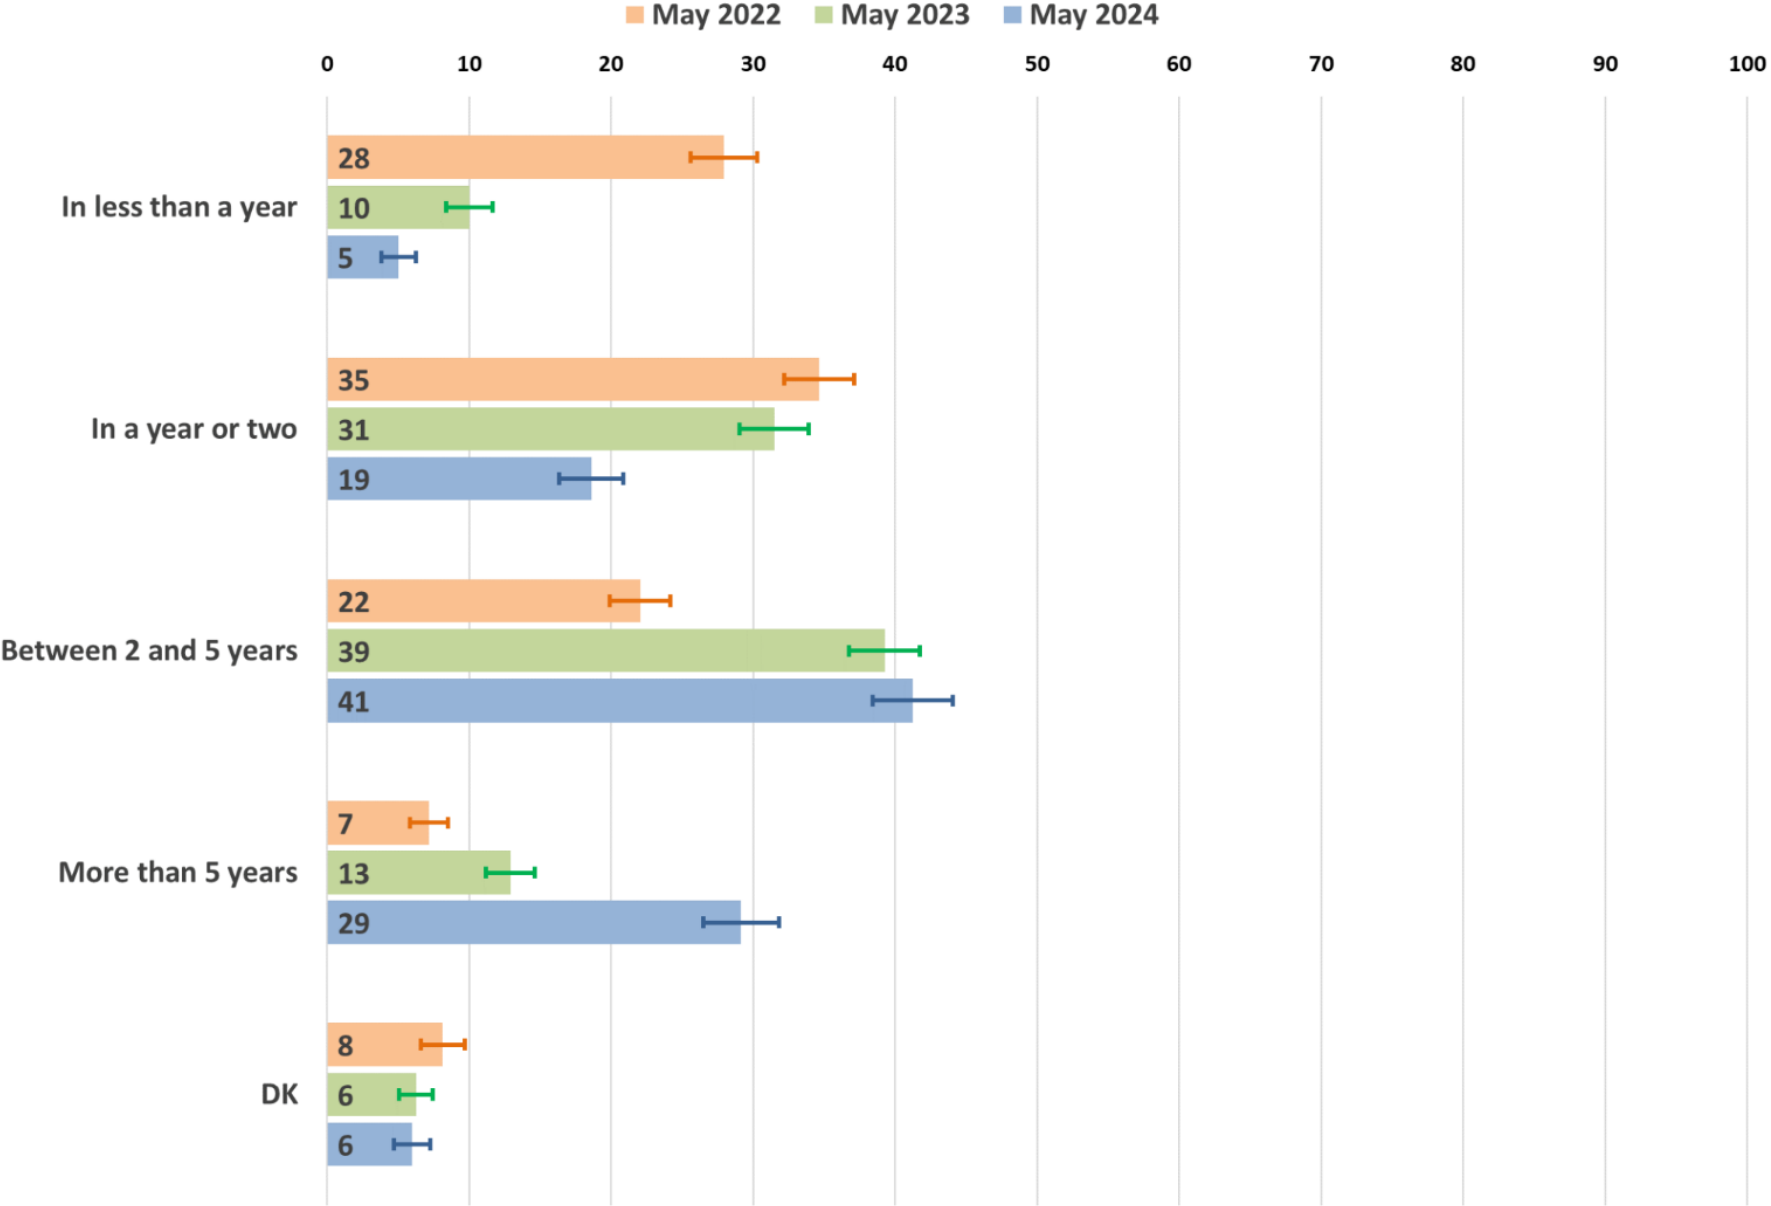

# By 2030, do you want/expect Ukraine to be...

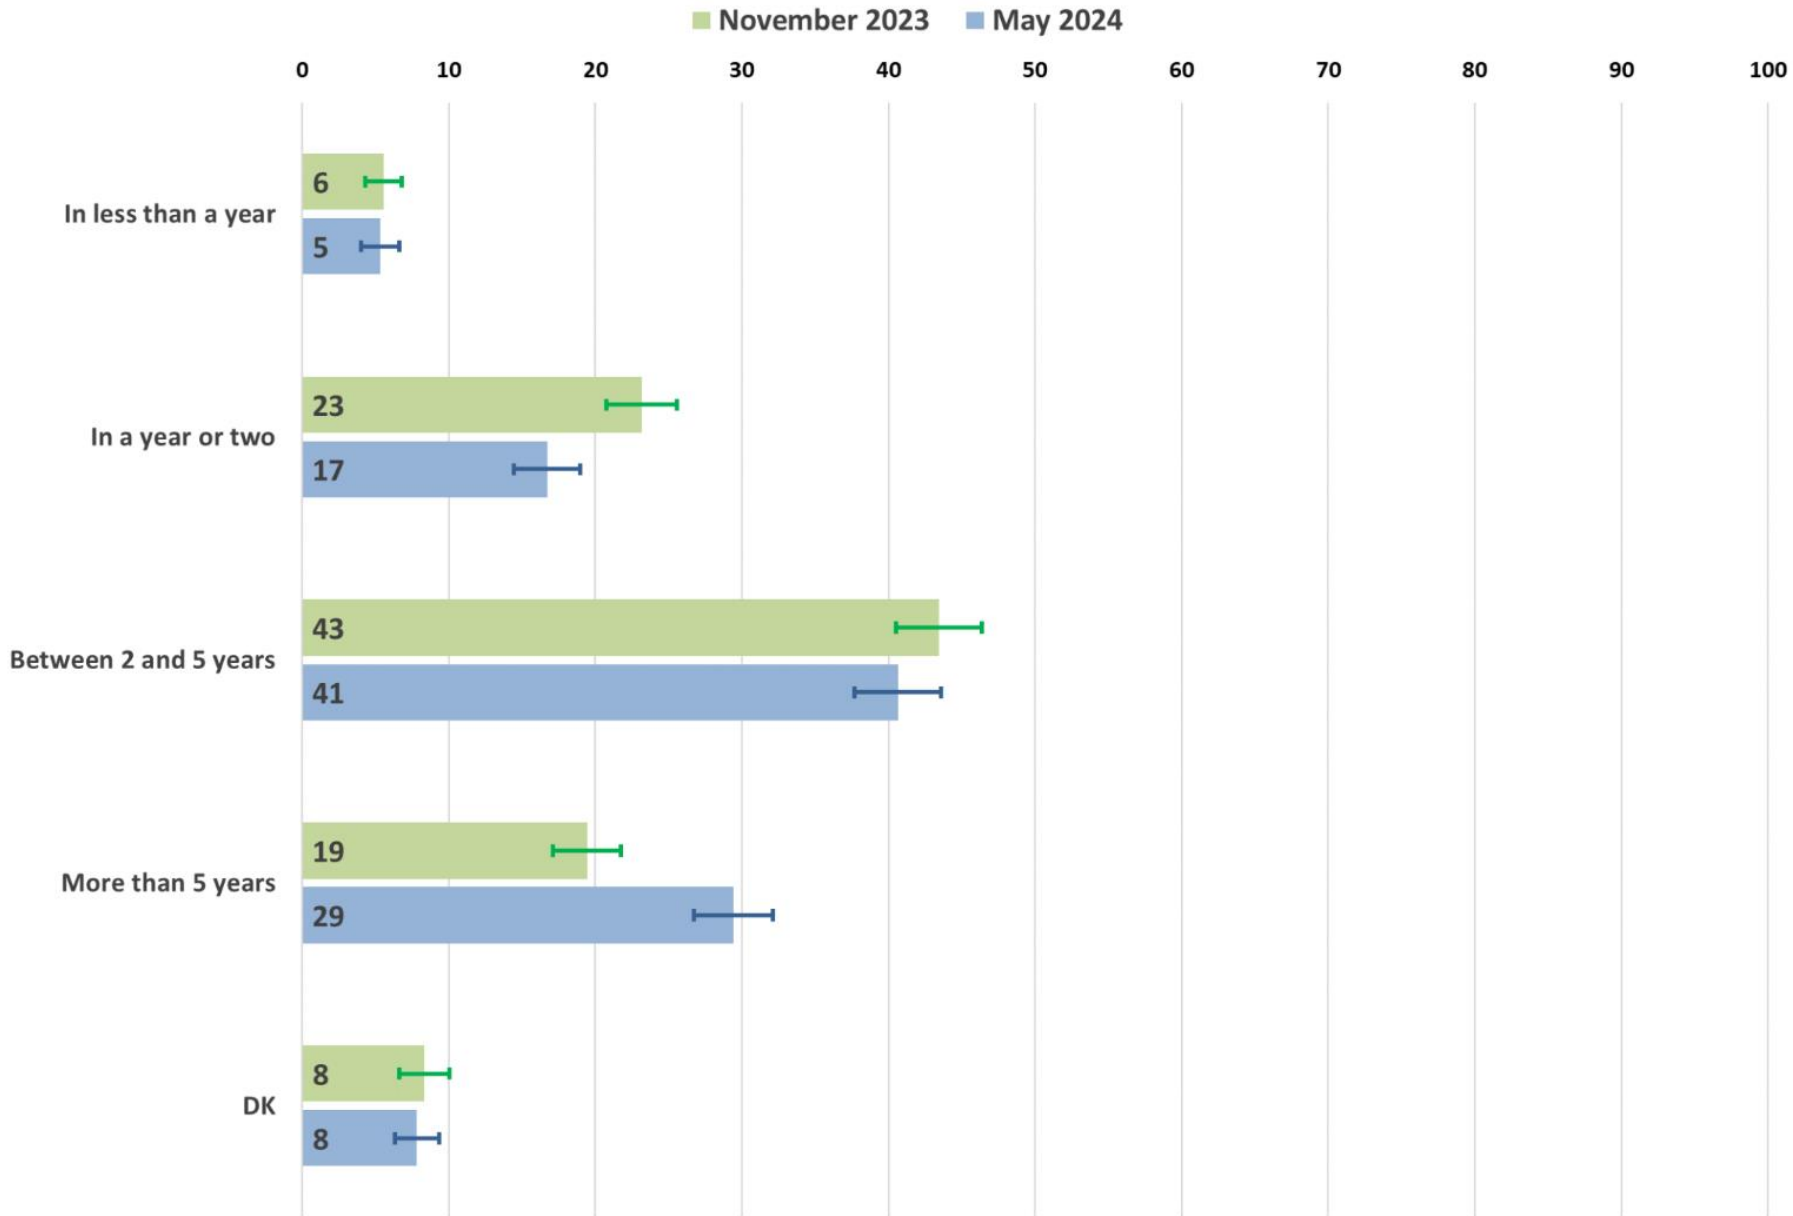

# When do you think Ukraine will become a member state of the EU? (q27)

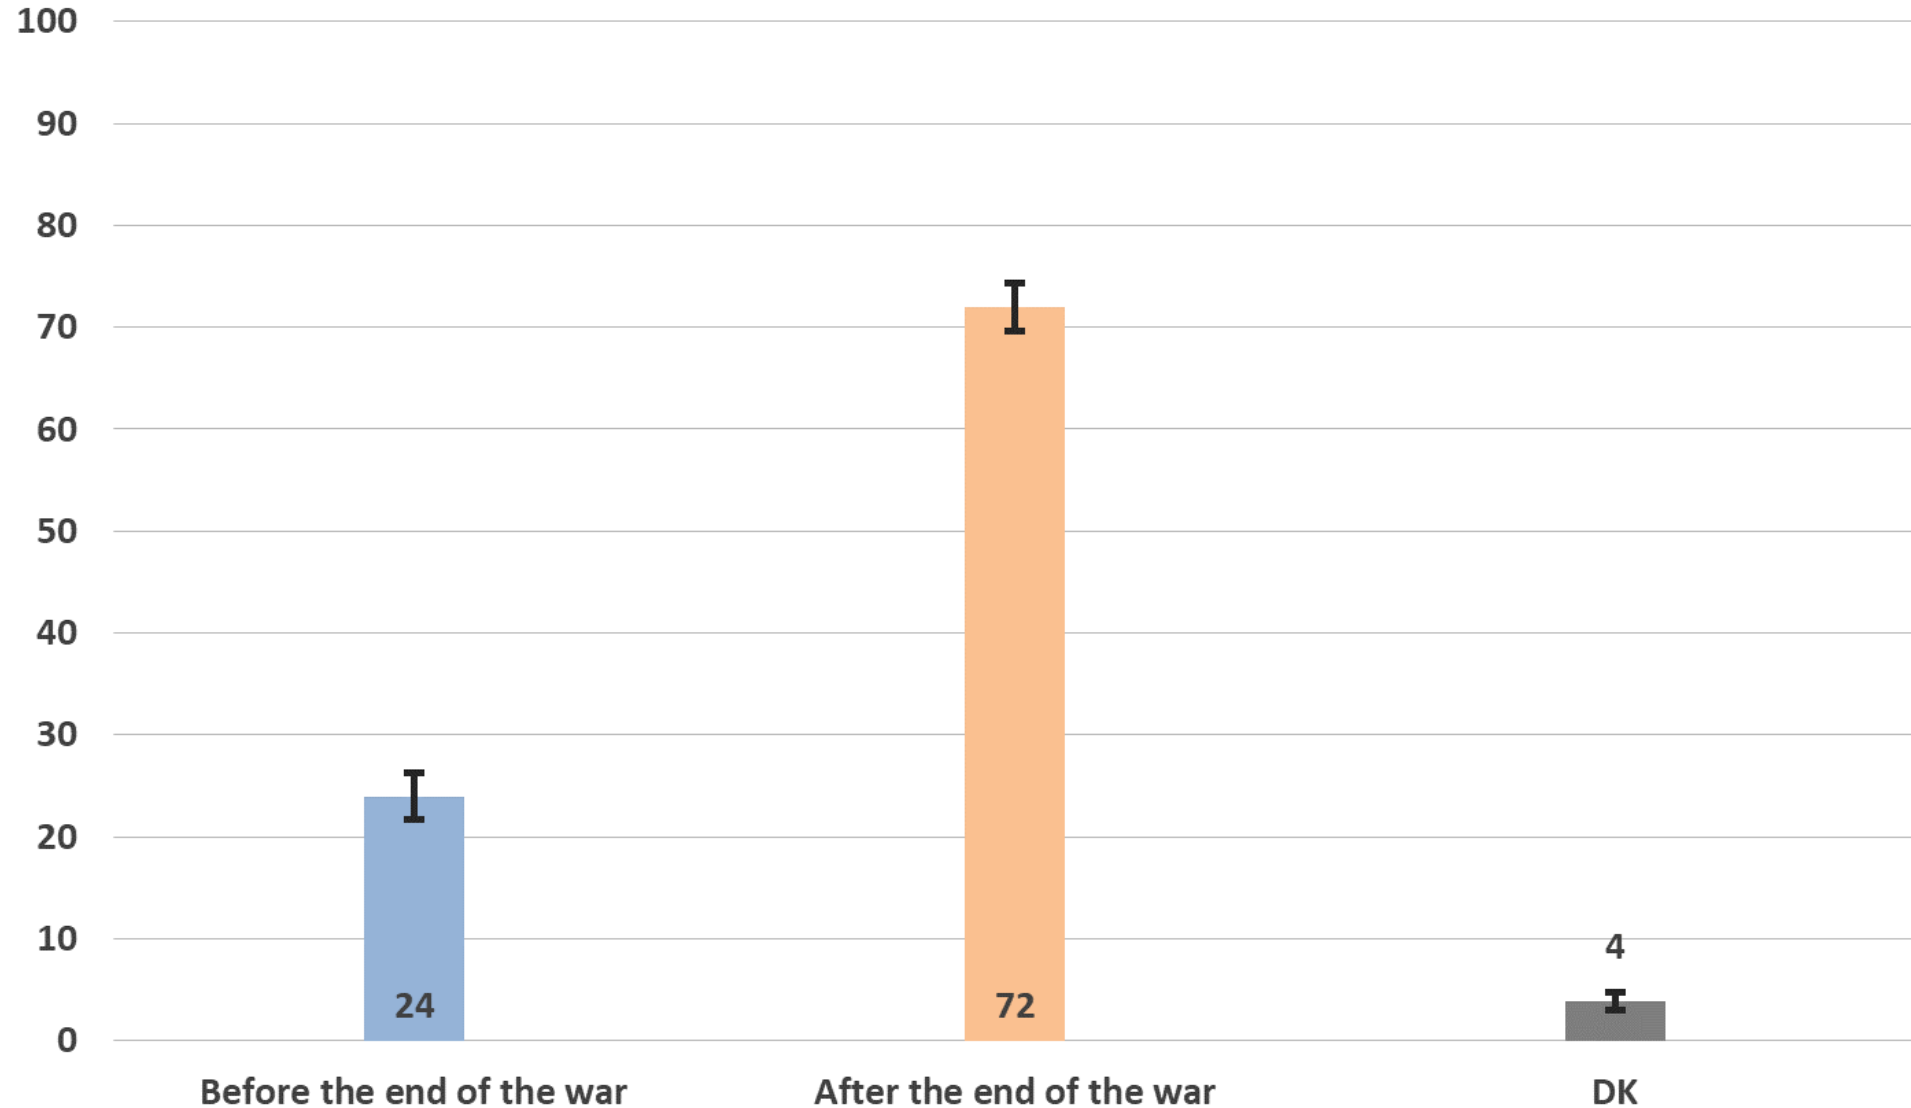

# When do you think Ukraine will become a member state of NATO? (q28)

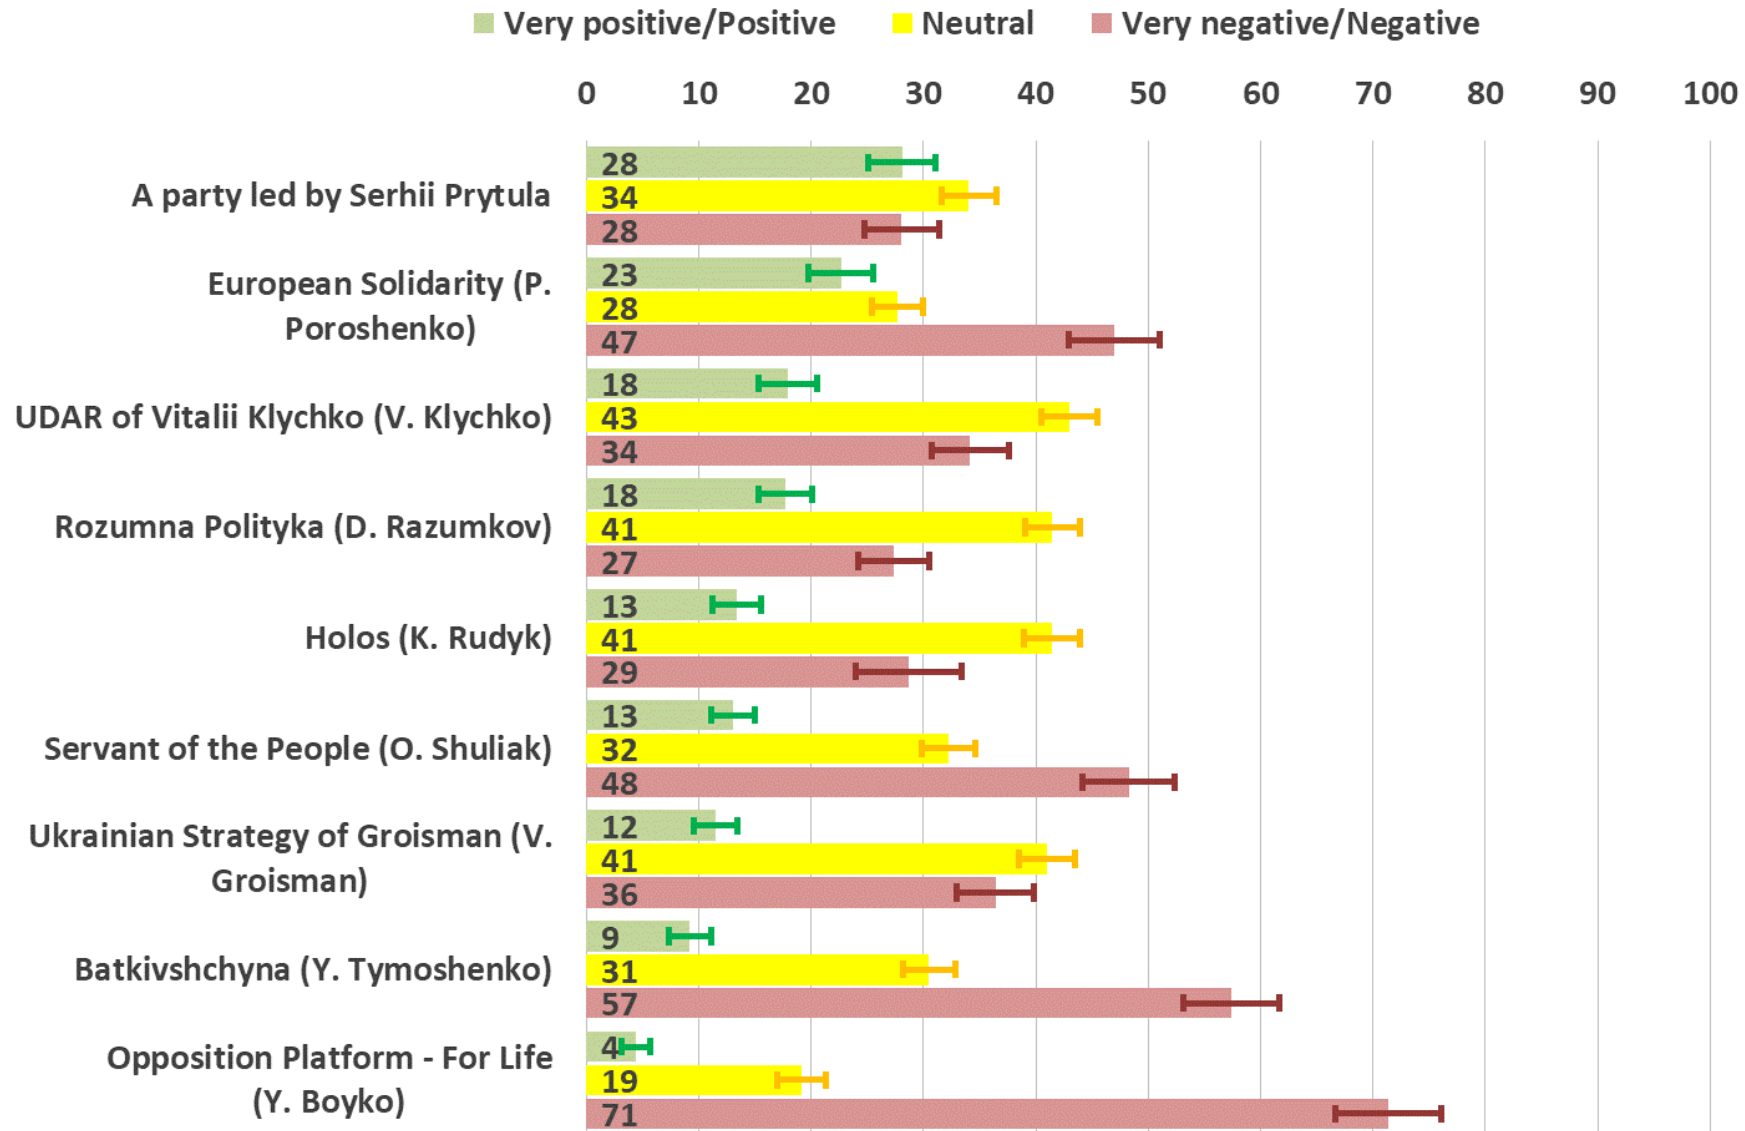

# POLITICS AND LEADERS

**There are conversations about how and when elections should take place in the context of the full-scale war. In your opinion, when should the government hold elections? (q31)**

# What is your attitude toward the following parties today? Very negative, negative, neutral, positive, very positive? (q35)

# METHODOLOGY

# Regular Telephone Survey Methodology

Fieldwork dates: May 8-25, 2024

2 508 completed interviews

The nationally representative sample was random:

- One-staged sample based on random generation of mobile phone numbers
- No additional quota or strata was used

The temporarily occupied territories before February 23, 2022 (Autonomous Republic of Crimea, city of Sevastopol, and occupied regions of Donetsk and Luhansk oblasts) were excluded from the sample. Respondents residing in the territories that were occupied after February 24, 2022 were interviewed (if they felt safe to answer the questions).

## Quality control

- All interviewers received a two-level training system
- Independent controllers conducted quality control interviews
- 30% of all interviews were checked by controllers
- All 2 508 interviews were conducted via telephone using CATI (Computer-Assisted Telephone Interview) software

The margin of error for national sample is 2.2%

- The margin of error is different for every response to every question in all surveys. In this presentation, the margin of error is shown for each question/option
- This is shown in the example on the right:
  - A is statistically greater than B and C
  - There is no statistical difference between B and C
- Percentage values in the research are rounded. As a result, the questions may have a total of 98-102% (and not 100%).
